

M BALAJI

AI Developer | Full-Stack & Machine Learning Projects

Palani, Tamil Nadu | +91 9123504507 | balajimagudi486@gmail.com

Portfolio: balaji-portfolio-farm19.vercel.app | LinkedIn: linkedin.com/in/balaji-m-133678383

CAREER OBJECTIVE

AI Developer with hands-on experience building full-stack applications and machine learning models, including image classification and data-driven prediction systems. Completed three internships spanning AI development, AWS cloud computing, and data science. Seeking an entry-level AI/ML or full-stack development role to apply Python, React, and Node.js skills to real-world products.

TECHNICAL SKILLS

- AI & Machine Learning: Image Classification, Model Training, Data Preprocessing, Kaggle Datasets, Predictive Modeling
- Programming & Web: Python, JavaScript, React.js, Node.js, REST APIs, HTML/CSS
- Data & Tools: Excel, Power BI, Git, Data Handling & Analysis
- Cloud: AWS Cloud Fundamentals, AI Service Integration

INTERNSHIP EXPERIENCE

AI Development Intern (Offline) — Infocs Technologies

Jun 2026 – Aug 2026

- Completed an on-site internship focused on artificial intelligence development, working directly with a technical team on AI project requirements and implementation.
- Gained hands-on exposure to AI development workflows, model concepts, and tooling in a professional environment.

Virtual Intern — Data Science Mastery — Siemens

Jun 2026 – Aug 2026

- Completed Siemens' Data Science Mastery program, applying data analysis techniques and machine learning concepts to structured datasets.

Virtual Intern — AWS AI-Powered Cloud Computing — EduSkills

Oct 2025 – Dec 2025

- Completed a virtual internship covering AWS cloud fundamentals and integration of AI services into cloud-based applications.

PROJECTS

FloraFarm — Crop Disease & Fertilizer Recommendation System — Full-Stack + ML

- Built an image classification model using the PlantVillage dataset (Kaggle) to detect crop diseases and pest infestations from leaf images.
- Trained a supporting model on a fertilizer dataset to recommend suitable fertilizers based on crop and soil conditions.
- Developed a full-stack web application (React, Node.js) to give farmers a simple interface for uploading images and viewing recommendations.

Golden Hour — Emergency Ambulance Dispatch Platform — Full-Stack (React, Node.js)

Status: In Progress — 70% Complete

- Building an Uber-style real-time dispatch platform connecting patients, ambulance drivers, and hospitals.
- Implementing React front end and Node.js back end with API integration for live location tracking and request matching.

EDUCATION

B.Tech, Artificial Intelligence & Data Science — SSMIET | III Year (Pursuing) | CGPA: 7.9

HSC (+2), Computer Science & Maths | 81%

SSLC — Arulmigu Palaniandavar Matric Hr. Sec. School, Palani - 624601

VALUE ADDED COURSES

- Artificial Intelligence & Machine Learning
- Networks and Essentials
- Excel
